*In the wake of the COVID-19 pandemic, more families than ever before are considering or reevaluating homeschooling. Lea Ann Garfias, homeschooling mom of six and herself a homeschool graduate, has all the information you need to succeed. She guides you through your toughest questions, including: Should I homeschool my kids? How do I get started? What books should I buy? What do I do in the first day? The first year? How do I know if my child is on track? If homeschooling is successful? What do I teach in each subject at every age? What is my own best way of teaching, and how can my child learn his own way? What if my child has a learning disability? What are the dangers of homeschooling, and how do I avoid them? Will homeschooling help my family draw closer to God and to each other? This complete reference guide will provide you with everything you need to successfully tackle homeschooling in your own style, filling your experience with confidence, grace, and the joy of learning.*

*The Best-Selling C++ Resource Now Updated for C++11*  
*The C++ standard library provides a set of common classes and interfaces that greatly extend the core C++ language. The library, however, is not self-explanatory. To make full use of its components—and to benefit from their power—you need a resource that does far more than list the classes and their functions. The C++ Standard Library: A Tutorial and Reference, Second Edition, describes this library as now incorporated into the new ANSI/ISO C++ language standard (C++11). The book provides comprehensive documentation of each library component, including an introduction to its purpose and design; clearly written explanations of complex concepts; the practical programming details needed for effective use; traps and pitfalls; the exact signature and definition of the most important classes and functions; and numerous examples of working code. The book focuses in particular on the Standard Template Library (STL), examining containers, iterators, function objects, and STL algorithms. The book covers all the new C++11 library components, including Concurrency Fractional arithmetic Clocks and timers Tuples New STL containers New STL algorithms New smart pointers New locale facets Random numbers and distributions Type traits and utilities Regular expressions The book also examines the new C++ programming style and its effect on the standard library, including lambdas, range-based for loops, move semantics, and variadic templates. An accompanying Web site, including source code, can be found at [www.cppstdlib.com](http://www.cppstdlib.com).*

*Interactive, aesthetic workbook that uses high-interest readings to show multiple contexts of words. "Scaffolded" chapters and exercises progressively reinforce previous chapters as the student moves through the book. The Interactive Vocabulary CD-ROM (optional) includes an audio component to aid students with pronunciation as well as additional interactive exercises. The academic readings provide a bank of pertinent words related to the subjects. *Prinzessinnen kommen in den Himmel. Skandalnudeln überall hin Daisy ist alles andere als ins Rampenlicht verliebt. Doch als ihre Schwester Ellie ihre Verlobung mit dem Kronprinzen Alex von Schottland bekannt gibt, ist es vorbei mit der Anonymität. Zur Vorbereitung auf die Hochzeit sollen Daisy und ihre Eltern den Sommer über bei der königlichen Familie verbringen. Schottland ist kalt, das Schloss zugig und Playboy-Prinz Sebastian, Anführer der berüchtigten »Königlichen Chaoten«, macht Daisy das Leben schwer mit uncharmanten Anmachen. Zum Glück gibt es den herablassenden und zugleich irgendwie doch attraktiven Miles, der dafür sorgen soll, dass Daisy das Hofzeremoniell lernt und dabei nicht unter die royalen Räder gerät Alle Bände der „Royals“-Reihe: ROYALS - Prinz Charming gesucht (Band 01) ROYALS - Herzensprinzessin (Band 02)*

*SIMATIC is the worldwide established automation system for implementing industrial control systems for machines, manufacturing plants and industrial processes. Relevant open-loop and closed-loop control tasks are formulated in various programming languages with the programming software STEP 7. Now in its sixth edition, this book gives an introduction into the latest version of engineering software STEP 7 (basic version) . It describes elements and applications of text-oriented programming languages statement list (STL) and structured control language (SCL) for use with both SIMATIC S7-300 and SIMATIC S7-400, including the new applications with PROFINET and for communication over industrial Ethernet. It is aimed at all users of SIMATIC S7 controllers. First-time users are introduced to the field of programmable controllers, while advanced users learn about specific applications of the SIMATIC S7 automation system. All programming examples found in the book - and even a few extra examples - are available at the download area of the publisher's website.*

*Romans Bible Commentary: This Bible commentary on the book of Romans offers a verse-by-verse study on the entire book. Since this commentary material was assembled by classes taught on the book of Romans, it is easy to use and understand. This Romans commentary has been widely received by many, including schools which help train preachers. Here is a small sample of the text. 5:9: Much more then, being now justified by his blood, shall we be saved from the wrath (of God) through him. This verse takes us back to what Paul said at the beginning of this chapter: God's people can be "justified" (dikaio), the same word used in Rom. 3:20! It is possible to completely remove sin. This can be done even though we still sin after becoming a Christian. Also, we can have justification at the present time ("now"). In this verse, Paul affirmed that our source for justification is Christ's "blood." Without the blood of Jesus, justification would be impossible (Heb. 10:4). Christ's blood is the basis for our justification, but the benefits of it must be accessed. This access comes by faith that is obedient (5:1). If Christ had not shed his blood, the only thing that we could and would experience is "wrath" (verse 9b). However, since the precious blood of the Lord was shed, Christians can be and will be saved from punishment. Christians are people who are at peace with God (verse 1) and have no fear of condemnation (8:1).*
