Now available in paperback- Pro Oracle Spatial for Oracle Database 11g shows how to take advantage of Oracle Databases built-in feature set for working with location-based data. A great deal of the information used in business today is associated with location in some way, and analysis of that data is becoming ever more important in today's mobile and highly connected world. In Pro Oracle Spatial for Oracle Database 11g, authors Ravi Kothuri and Albert Godfrind address: The special nature of spatial data and its role in professional and consumer applications Issues in spatial data management such as modeling, storing, accessing, and analyzing spatial data The Oracle Spatial solution and the integration of spatial data into enterprise databases How spatial information is used to understand business and support decisions, to manage customer relations, and to better serve private and corporate users When you read Pro Oracle Spatial for Oracle Database 11g, you're learning from the very best. Ravi Kothuri is a key member of Oracle's Spatial development team. Albert Godfrind consults widely with Oracle clients on the implementation of Oracle Spatial, develops training courses, and presents frequently at conferences. Together they have crafted a technically sound and authoritative fountain of information on working with spatial data in the Oracle database.

Plump, grumpy, slumped on the couch, and going nowhere fast at age 16, Phil Gaimon began riding a bicycle with the grand ambition of shedding a few pounds before going off to college. He soon fell into racing and discovered he was a natural, riding his way into a pro contract after just one season despite utter ignorance of a century of cycling etiquette. Now, in his book Pro Cycling on \$10 a Day, Phil brings the full powers of his wit to tell his story. Presented here as a guide--and a warning--to aspiring racers who dream of joining the professional racing circus, Phil's adventures in road rash serve as a hilarious and cautionary tale of frustrating team directors and broken promises. Phil's education in the ways of the peloton, his discouraging negotiations for a better contract, his endless miles crisscrossing America in pursuit of race wins, and his conviction that somewhere just around the corner lies the ticket to the big time fuel this tale of hope and ambition from one of cycling's best story-tellers. Pro Cycling on \$10 a Day chronicles the racer's daily lot of blood-soaked bandages, sleazy motels, cheap food, and overflowing toilets. But it also celebrates the true beauty of the sport and the worth of the journey, proving in the end that even among the narrow ranks of world-class professional cycling, there will always be room for a hard-working outsider.

Proceedings -- Parallel Computing.

In diesem Buch sind die Ergebnisse des Forschungsprojektes „komDRIVE“ dargestellt. Das Vorhaben analysierte die Potenziale des Einsatzes von elektrischen Fahrzeugen in verschiedenen Branchen des urbanen Wirtschaftsverkehrs. Darauf aufbauend wurden die Auswirkungen des Einsatzes von elektrischen Fahrzeugflotten auf elektrische Netze, unter Berücksichtigung der Aspekte Energieerzeugung, ?speicherung und -verteilung untersucht. Dabei standen insbesondere die Batteriealterung und Batteriekosten sowie das Netzintegrationsmanagement im besonderen Fokus der Betrachtungen. Durch den Einsatz von entsprechenden Modellen konnten die Verringerung der lokalen (Luftverschmutzung) und der globalen Emissionen (Klimagase) durch den größeren Einsatz von Elektrofahrzeugen abgeschätzt werden. This book contains the results of the research project „komDRIVE“. The project analyzed the substitution potential of commercial transport vehicles with internal combustion engines by electric vehicles for different economic sectors in urban agglomerations. Based on this analysis the effects of electrical vehicle fleets on electrical nets were investigated, paying special attention to aspects of energy production, storage and distribution. In particular, battery aging and battery costs as well as net-integration management were investigated. The decrease of local (pollution) and global (GHG) emissions by an increased use of electric vehicles was simulated with appropriate models.

This is a new sixteenth edition of the Directory of EU Information Sources. It brings together a broad range of information sources, comprising not only the various constituent institutions of the European Union, their personnel, publications, information websites and representations in Europe and the rest of the world, but also diplomatic representation in Brussels, European-level trade and professional associations and NGOs, consultants and lawyers specializing in EU affairs, Press Agencies, EU grants and loans programmes, and universities offering courses in European integration. This is the most comprehensive compilation of contacts and published information on the European Union, providing access to over 12,500 information sources.

Provides information on publisher, operating system, memory requirements, and cost for thousands of programs in accounting, agricultural management, banking, inventory, communications, engineering, investment, and word processing

The 1982 statistics on the use of family planning and infertility services presented in this report are preliminary results from Cycle III of the National Survey of Family Growth (NSFG), conducted by the National Center for Health Statistics. Data were collected through personal interviews with a multistage area probability sample of 7969 women aged 15-44. A detailed series of questions was asked to obtain relatively complete estimates of the extent and type of family planning services received. Statistics on family planning services are limited to women who were able to conceive 3 years before the interview date. Overall, 79% of currently married nonsterile women reported using some type of family planning service during the previous 3 years. There were no statistically significant differences between white (79%), black (75%) or Hispanic (77%) wives, or between the 2 income groups. The 1982 survey questions were more comprehensive than those of earlier cycles of the survey. The annual rate of visits for family planning services in 1982 was 1077 visits /1000 women. Teenagers had the highest annual visit rate (1581/1000) of any age group for all sources of family planning services combined. Visit rates declined sharply with age from 1447 at ages 15-24 to 479 at ages 35-44. Similar declines with age also were found in the visit rates for white and black women separately. Nevertheless, the annual visit rate for black women (1334/1000) was significantly higher than that for white women (1033). The highest overall visit rate was for black women 15-19 years of age (1867/1000). Nearly 2/3 of all family planning visits were to private medical sources. Teenagers of all races had higher family planning service visit rates to clinics than to private medical sources, as did black women age 15-24. White women age 20 and older had higher visit rates to private medical services than to clinics. Never married women had higher visit rates to clinics than currently or formerly married women. Data were also collected in 1982 on use of medical services for infertility by women who had difficulty in conceiving or carrying a pregnancy to term. About 1 million ever married women had 1 or more infertility visits in the 12 months before the interview. During the 3 years before interview, about 1.9 million women had infertility visits. For all ever married women, as well as for white and black women separately, infertility services were more likely to be secured from private medical sources than from clinics. The survey design, reliability of the estimates and the terms used are explained in the technical notes.

The editors of Consumer Reports rate a wide range of consumer items, in an updated buying guide for new products, which includes advice on how to purchase kitchen items, automobiles, entertainment products, and home office equipment, along with more than eight hundred product ratings, brand repair histories, and other helpful features. Original. 200,000 first printing.
