Police Corruption in the NYPD: From Knapp to Mollen explores how the New York Police Department experienced two major investigations within a quarter of a century. It compares the states of corruption within the NYPD during the Knapp and Mollen commissions, examining why corruption continued and why the revealed ethical breaches became more serious. It also discusses how corruption was enhanced even after accountability and responsibility were assigned to department administration. The book gives in-depth discussions of the Knapp and Mollen reports and relates the history and relevance of efforts to combat corruption and to improve police practices. It uses empirical data from interviews and current NYPD recruit training documents as reference materials in examining police practices. It also identifies failures of leadership that contributed to the systemic ethical degeneration of the NYPD. Police Corruption in the NYPD goes beyond the training of ethics and enforcement by delving into the departmental failures that permit officers to develop from being merely unethical to becoming criminals. By presenting and analyzing theories of corruption from current authorities, it lays a foundation for critical discussion and comparison between commissions as well as current department ethical training and practices.

Tracing the rise of digital computing in policing and punishment and its harmful impact on criminalized communities of color The U.S. Bureau of Justice Statistics estimates that law enforcement agencies have access to more than 100 million names stored in criminal history databases. In some cities, 80 percent of the black male population is registered in these databases. Digitize and Punish explores the long history of digital computing and criminal justice, revealing how big tech, computer scientists, university researchers, and state actors have digitized carceral governance over the past forty years—with devastating impact on poor communities of color. Providing a comprehensive study of the use of digital technology in American criminal justice, Brian Jefferson shows how the technology has expanded the wars on crime and drugs, enabling our current state of mass incarceration and further entrenching the nation's racialized policing and punishment. After examining how the criminal justice system conceptualized the benefits of computers to surveil criminalized populations, Jefferson focuses on New York City and Chicago to provide a grounded account of the deployment of digital computing in urban police departments. By highlighting the intersection of policing and punishment with big data and web technology—resulting in the development of the criminal justice system's latest tool, crime data centers—Digitize and Punish makes clear the extent to which digital technologies have transformed and intensified the nature of carceral power.

Police Corruption in the NYPD

Materials Evaluation

Bimonthly. Worldwide literature (journal articles and monographs) about police work, including organization and administration, operations, forensic sciences, and forensic medicine. Classified arrangement. Each entry gives bibliographical information and brief to lengthy abstract. Subject, author indexes.

Neurology in Clinical Practice: Principles of diagnosis and management

Books in Print, 2004-2005

Every year, esteemed scholars and practitioners meet at the International Police Executive Symposium to discuss contemporary issues in policing and share ideas about effective strategies in their jurisdictions. Drawn from the proceedings at the Thirteenth Annual Meeting held in Turkey and updated with new developments since the conference, Strategic Responses to Crime: Thinking Locally, Acting Globally describes how local police agencies are addressing issues of crime that have global implications. With contributions from a diverse panel of experts, the book combines scholarly perspectives with those of practitioners and explores issues in various cultural settings worldwide. Topics discussed include: Community policing and police innovations such as safety and security councils Performance management systems in police organizations Efforts to combat drug cultivation and trafficking International terrorism and individuals' motivations for joining terrorist organizations Approaches for handling and policing the mentally ill in accordance with human rights concerns Cybercrime and child sexual abuse Crime scene assessment, information gathering, and case development and management Jurisprudence, law, and empirical research related to racial profiling in the United States Computer technology and crime analysis tools and models Emerging police administration strategies Combining empirical evidence from scholarly studies with in-the-trenches experience from practitioners, this volume assembles critical insight into a range of issues relevant to policing in the 21st century.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)
