Abstract: A curriculum for preschool nutrition education is designed around 7 basic nutrition concept areas: food and nutrients, nutrient needs, nutrition and health, nutrition and the life cycle, food handling, food selection, and food as a resource. The primary emphasis is on learning through experiences requiring children to use their senses. There are 7 unit plans (collections of activities which can be used to teach a concept based on a chosen subject) and corresponding daily lesson plans which use some of the suggested activities from the unit plan to structure a day's activities. Each lesson plan lists goals, behavioral objectives, materials needed and learning activities. Also included are annotated bibliographies of preschool children's books, preschool curriculum materials, audiovisuals and other teaching materials. (js). Engaging, readable, student-friendly, and practical, this text is built on a strong theoretical and research base, and illustrated and clarified with real-life examples of children and teachers from today's diverse classrooms. Written to reflect cutting-edge theory, new research, the latest policies, the new Common Core State Standards, and best practices in the rapidly changing world of language arts instruction, Carole Cox's new Seventh Edition continues to guide students as they learn the many skills required to become an effective teacher today.--Publisher's description. The author states that the three purposes of the book are to suggest ways to promote effective communication in the elementary-school classroom, to indicate the speaking activities that are part of the language-arts program, and to note the part the classroom teacher plays in improving the child's speech. Many speech activities are suggested, but the important place of poetry is stressed. Poetry is far too frequently omitted from classroom- activities, partially because of teachers' lack of security in handling it with children; the author's treatment of this subject should help to bolster the confidence of young teachers and encourage them in the use of poetry. A chart lists the aims of speech education and information about the growth of children in language, and should be a helpful guide. A practical book with many examples of actual classroom experiences and school activities, of children's problems related to speech, and of faulty co-operation in dealing with such problems. The major responsibility, of course, for speech training in the school lies with the classroom teacher. Handbook to brining books together with children in grades K-8. Suggests games, crafts, and activities for sick children

As a teacher, you have the unique opportunity to teach and inspire your students to be goal-oriented, compassionate, confident, and ambitious. Anna Unkovich, a former teacher of thirty-five years, made a difference in her students' lives through the daily use of stories from the bestselling series *Chicken Soup for the Soul*. For many years, Unkovich read these stories to her students and noticed remarkable changes in them, both academically and personally. Recognizing that today's teenagers have more challenges in finding positive role models, she teamed up with bestselling author Mark Victor Hansen and veteran teacher, inspirational speaker, and bestselling author Jack Canfield to create an unprecedented educational curriculum for teachers to use to empower their students in the same way that they have. Unkovich chose the most inspirational stories from the more than one hundred *Chicken Soup* books published. These stories, activities, and plans will enhance your existing curriculum. Designed to be read aloud to students, each story is accompanied by thought-provoking questions and exercises specifically designed and used by the authors. Your students will identify with each of the powerful stories and will be encouraged to apply the lesson plans to their own lives, challenges, and situations, and at the same time improve their critical thinking and writing skills. More important, unlike other curriculums, *Chicken Soup for the Soul in the Classroom* educates and provides opportunities for open dialogue on real-life issues, including character building and self-esteem. Use *First-Rate Reading Basics: Phonemic Awareness and Phonics* to produce first-rate readers with fun, interactive,
